- A TUI implementation of the popular UNO game
- Supports multiplayer and simultaneous games with lobbies
- Implemented WebSockets allowing two-way communication
- Conducted comprehensive JUnit testing

COVER LETTER

Dear Hiring Manager,

I recently stumbled upon your company while casually scrolling through my LinkedIn feed. Intrigued, I embarked on a deeper exploration of your company. What I discovered truly resonated with my passions and ambitions, and I am writing to express my keen interest in becoming a part of your organization.

My education and experience have prepared me well for a role in the field of technology. As a Full Stack Developer, I implemented key features of a web app such as user authentication, navigation systems and interactive dashboards. I was also responsible for designing REST APIs. Furthermore, as a Help Desk Assistant I conducted troubleshooting and resolved IT-related issues for 10000+ users. I also have experience in developing graphical user interfaces and designing user-centered solutions as a UI/UX designer. In addition, my work as a waiter honed my communication skills and customer service abilities.

My personal projects showcase my ability to work with a wide range of technologies, including HTML/CSS/Javascript, Python, Java, React.js, MongoDB, and Firebase, among others. One such project is my own mobile app called [styll](#), which has recently reached 2000 users.

I am a highly motivated and driven individual, committed to delivering high-quality results and continuously striving for personal and professional growth. My problem-solving skills and natural ability to quickly learn new technologies and methodologies make me a valuable asset to any team.

I would love the opportunity to further discuss how my skills and experience can benefit your company. Thank you for considering my application. I look forward to hearing from you soon.

Sincerely,
Gracjan Chmielnicki
